

# Research Method Support Project

## Phase 3 from August 2017

**Aims:** Help projects increase the quality and effectiveness of research activities through improving research methods, data collection, handling and analysis

**Actions:**

- Direct support to projects. Help with...
  - Designing studies – particularly participatory experiments and observations
  - Organising and managing data
  - Statistical analysis
  - Qualitative and mixed methods analysis
  - Reporting and presenting results
  - Research quality improvement
- Training
- Developing and sharing methods and the resources to support them
- Helping regional and program teams integrate sound methods

**Contacts in E Africa:**

Ric Coe ([r.coe@stats4sd.org](mailto:r.coe@stats4sd.org))

Shiphar Mulumba ([m.shipar@stats4sd.org](mailto:m.shipar@stats4sd.org))

**Our rules for working with you:**

In order to offer effective support to projects we will need access to unpublished plans, protocols, data, reports, etc. In handling such material we will abide by the following rules:

- *We will not share with a third party any data or document supplied to us by projects without permission of the authors.*
- *We will keep such material in a secure location so that it cannot be obtained by others.*
- *We will not refer to identifiable individuals in any publication we produce without permission of those individuals.*
